The intelligent e-Commerce solution

Several levels lead you directly to the correct instrument. Then you can even order the ideal instrument you've configured online with KROHNE's new Configure It.

Most reliable and easiest instrument

The implemented logic excludes non-relevant choices, the resulting instrument is accurately configured for your needs.

The expert system considers all factors, and you can experience how this intelligent system thinks for you. After only a few questions, Configure It will present the right instrument for your needs.

Always up to date

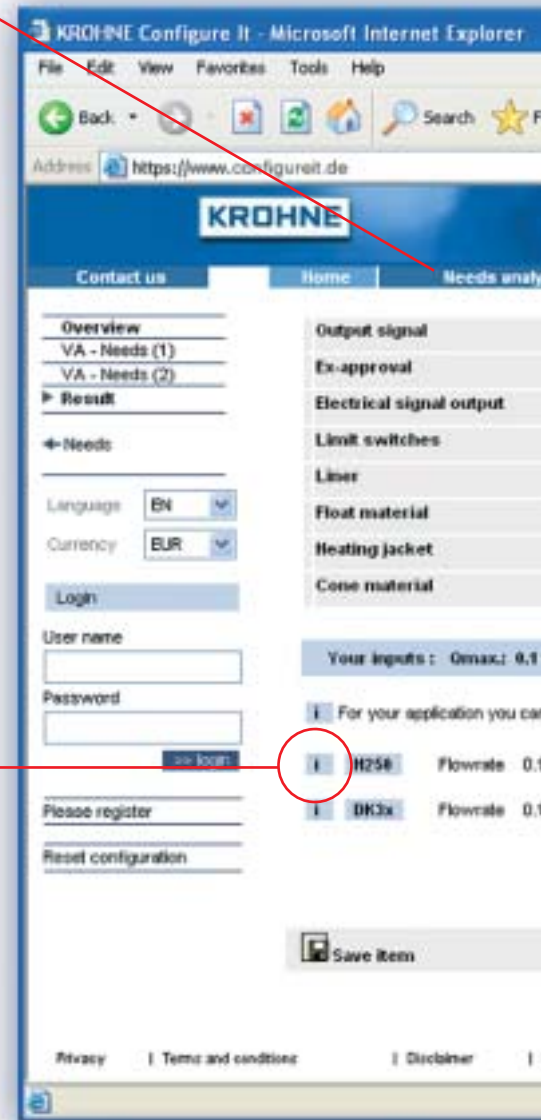

This leading system for the KROHNE-group worldwide, always contains the most recent information for you.

Needs analysis

Configure It supports the planner during the choice of the correct measuring principle for the application with the help of the needs analysis, an expert system. Only a few inputs are necessary to obtain the best measuring principle.

You are guided step-by-step to the correct level or flow instrument for your application.

Throughout the selection process you will be given key information to help you make the right choice.

Configure It

Tap into our know how. You don't need to install any software nor do you need to register.:

www.ConfigureIt.de

Measuring principle

Via this access level the user choose his preferred measuring principle. After entering the required application data, Configure It will show you to the best instrument.

Products

You know exactly which product you require.

So choose it out of a list, give the required application input, and you'll have your instrument recommendation in next to no time.

Spare parts

The shortest way for the correct spare part.

Just select the required spare part directly from the technical drawing.
