

KROHNE presents its new food brochure

Präzision ist das beste Rezept.
Intelligente Lösungen für die Lebensmittel- & Getränkeindustrie.

With its current brochure for the food and beverage industry, KROHNE provides users with an overview of the entire spectrum of measuring technology. It covers flow and level, pressure and temperature. The brochure includes solutions for conventional as well as difficult applications in plants of well-known companies of the industry. Illustrative aids show examples of measuring equipment in for example in beverage filling. The state-of-the-art in technology is showcased along this production chain. The brochure covers processes in breweries, juice, milk and ice cream production.
