

Electronic product catalog with 2D and 3D CAD models of all KROHNE products

By providing 2D and 3D CAD drawings, effective immediately, KROHNE is actively supporting its customers' computer-integrated project management and thus significantly increasing customer planning reliability.

. In addition, KROHNE will make all of the device series in the product range available in the form of IGES and DWG datasets. Practically every common construction software supports the import of these neutral data formats. Other data formats are also possible upon request.

The drawings are available for download from KROHNE's own online configurator, Configure It (www.krohne-direct.com) under the 2D/3D CAD category. After quickly and easily selecting the desired type of device, the drawings can either be viewed directly on the screen or conveniently imported into your own CAD system
