

Veolia Water Solutions & Technologies relies on KROHNE

Duisburg, November 17, 2008: Veolia Water Solutions & Technologies has chosen KROHNE as one of its international suppliers of measurement equipment and related services. The framework agreement was signed on Tuesday, Nov 4 at KROHNE headquarters in Duisburg. KROHNE will be one of the suppliers providing flow measurement devices and services for water and wastewater projects and applications.

Signing parties of Veolia Water Solutions & Technologies and KROHNE

Left to right: A. Kieffer, F. Scipion, M. Rudelli, M. Dubbick, M. Buttman, M. Clemens, R. Sol, S. Duthe, S. Neuburger

Veolia Water Solutions & Technologies is the worlds' leader in water treatment, providing turnkey installations and technological solutions for local authorities and industries worldwide. The French based company employs 7,741 people and has 120 subsidiaries in over 55 countries.

As its new business partner, KROHNE will provide instruments for volumetric and mass flow measurement, along with additional calibration and maintenance services. This will not be the first time that KROHNE and Veolia Water Solutions & Technologies have joined forces: In the past, both companies have completed several joint projects, including the instrumentation of a desalination plant in Australia.

Ronald Sol, Strategic Purchasing Director for Veolia Water Solutions & Technologies, says: "As a global company, we set very high standards for our business partners. Among the competitors, KROHNE was one of the best applicants who could provide the right mixture of a broad flow-measurement portfolio, high product quality and complementary services. In addition, our past experiences in several projects with KROHNE ensured us that KROHNE is capable of serving Veolia Water Solutions & Technologies in a good way."

Monika Clemens, Director Strategic Accounts / Global Partners at KROHNE, adds: "The contract is a fantastic achievement for KROHNE. We are looking forward to developing very close relationships with the responsible Veolia Water Solutions & Technologies companies around the world and working with them to provide the best possible solutions to their needs."

About KROHNE: Established in 1921, KROHNE is a family-owned business employing 2,510 people around the world with representatives on all continents. The company headquarters are based in Duisburg, Germany. KROHNE is a market leader in the development, and manufacture of innovative measurement technology and prides itself on exceeding customer

expectations in terms of quality, performance capability, service and design.

About Veolia Water Solutions & Technologies: Veolia Water Solutions & Technologies is the technical competence group of Veolia Water, the leading operating company for water services, supplying 110 million people worldwide each day.

Veolia Water Solutions & Technologies is the global leader in water and waste water treatment, providing turnkey installations and technological solutions for local authorities and industries worldwide. It designs and builds plants for municipal use, e.g. drinking water, wastewater or sludge treatment plants and desalination facilities. For its industrial customers, the company also provides tailor-made solutions for process water, sludge or effluent treatment as well as recycling and reuse services. In addition, Veolia Water Solutions & Technologies is responsible for the design and implementation of technological solutions such as engineering, pre-industrialized solutions, standard equipment and associated services.
